***MSES Specialized Concentration Form***

When a student has career goals that are not properly served by any of the existing concentrations, he or she may design a specialized concentration with the aid of a faculty advisor. Each specialized concentration must contain one set of required courses from one of the regular (MSES) concentrations. Thus, a specialized concentration becomes a variation on one of the existing concentrations, with flexibility provided by the (concentration) electives. A student must submit a written proposal outlining and justifying his/her course of study, which must be approved by a concentration faculty advisor.

Total: 21-22 Credit Hours
