Installation Instructions

## Installation

For more installation details, please see the file *Install.html* on your CD.

*Minimum system requirements:*

### Windows

- Windows 98/ME/NT4/2000/XP
- 128 MB RAM minimum
- 400 MB hard disk space

### Macintosh

- Mac OS X 10.2.3 or later
- 256 MB RAM minimum
- 400 MB hard disk space

### Linux

- Linux x86 (Red Hat 7.2, 7.3, 8.0, 9.0, or equivalent)
- 128 MB RAM minimum
- 500 MB hard disk space

*Starting the Installer*

**Windows:** If Autoplay is enabled, the Maple installation will begin

automatically. If you have disabled Autoplay, you can start the installer by clicking *D:\windows\Disk1\InstData\WinstallMaple11.exe* (where D is the CD-ROM drive with the Maple CD).

**Macintosh:** After inserting the CD double-click the *MAPLE 11* icon and then double-click the *Maple 11 installer* icon.

**Linux:** Once the CD drive is mounted and the CD is inserted, run the installer with the command *\$CDPATH/installMapleLinuxSU*. Here *\$CDPATH* is the path to your CD drive, for example */mnt/cdrom*.

After this point differences between the installations on different platforms are minor. The installer will prompt you to ask for your preferences and install Maple.

## Activating your license

You must activate your installation to obtain the license file and run Maple. For activation **you need the purchase code located on the CD sleeve**. You can activate after the installation with the following steps.

1. Connect to the Internet.
2. Start Standard Worksheet Maple 11.
3. When prompted to activate, click *Activate*.
4. Enter your purchase code from the CD sleeve.
5. Complete the online form and click *Next*.

**This purchase code is valid for one installation. It will not work on multiple machines.**

## Where to Get Help
